

# The Sunnyfield Proposal

## Proposal:

A federal jurisdiction helicopter rescue emergency unit for lake Minnetonka and other near by lakes and islands that would double for an aviation school as unnecessary as it is currently in year round support for Minnesota private islands, it is necessary to allow private owned Lake Minnetonka Islands to have single family residential dwelling homesteads to the whole island by itself. With out the ability to land on islands a helicopter is the only year round emergency response possibility with trained professionals that can drop in with stretchers and medical rescue even when the ice is unsafe two seasons out of a year. So the following single federal jurisdiction lot and road changes is what I've come up with personally, no experience necessary or ownership allowance to it available, but on account of the Minnetrista authority federal being jurisdiction and a bus depot that probably has diesel gas pumps already right there:

- To extend Kingswood Road, going northwest from Game Farm Road intersection, and connecting to West Branch Road at the southeast corner of, while bringing any dirt road there of, up to moderate traffic requirements, in order to make a more direct path route from the Sunnyfield and West Branch area to Waconia Hospital.
- As well, the lot of 5902 Sunnyfield Road East, Mound, MN 55364 to be road way connected to West Branch and Sunnyfield, and commence development of a helicopter aviation school and rescue equipped with coast card helicopters and acute E.R. supplies.

## Affected:

Due to the amount of money excessively that would have to go toward establishing service people and building a facilitation for such case scenario event, it is likely a very costly and time consuming thing, and islands as they are today with the one Eagle Island exception, remain other ways of use like park, seasonal rentals of two residential housings or community more enough to have emergency professions. So the field trip is something I thought that could raise awareness better, because uneducated help becomes time consuming to the police attorney to have to answer to they will not cover that land more then already may by water patrol. In my proposal outlined in this document, the persons below are those owners of land, and taxpayers of the listed properties that would be potentially affected, or on the border of with the construction.
